

FORAGE FIRST®

715 Forage Mix

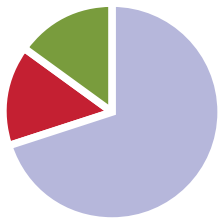

- Suited for traditional hay production – also transitions well into increased management environments
- Red clover & timothy increase tolerance to wetland conditions
- Good winter hardiness allows 715 to move well both North & South in the Midwest
- Capable of providing both hay in the spring & grazing production in the summer & fall

715 Forage mix is a dependable alfalfa based pasture mix that is well suited for a variety of soil conditions. It serves as an excellent choice for a multiple year hay and pasture mix.

- **Includes CrosseCoat™** - an elite platform of proven seed coating and treatments to enhance germination, establishment and survival

FORAGE FIRST® FACTOR: We provide a diverse set of mixes to produce high quality forage for your unique operation. Our versatile pasture mix portfolio offers a variety of proven products to fit any need, created with flexibility and ease of management in mind.

All Forage First® pasture mixes contain top performing forage varieties for improved yield, higher nutritional value, increased stand life and grazing tolerance, excellent regrowth and more.

70% FF 42.A2 Alfalfa
 15% Red Carpet® XL Red Clover
