

FORAGE FIRST®

Alfalfa-Based Forage Mix

- Especially suited for high quality forage environments
- Sound management will ensure this mix persists for 3 to 5 years
- Best adapted to well drained soils with a pH of 7.0 to 7.5, however clover will succeed in poorly-drained environments

Alfalfa-Based Forage Mix is a dependable based pasture mix designed for hay production where some grass is required.

- **Includes CrosseCoat™** - an elite platform of proven seed coating and treatments to enhance germination, establishment and survival

FORAGE FIRST® FACTOR: We provide a diverse set of mixes to produce high quality forage for your unique operation. Our versatile pasture mix portfolio offers a variety of proven products to fit any need, created with flexibility and ease of management in mind.

All Forage First® pasture mixes contain top performing forage varieties for improved yield, higher nutritional value, increased stand life and grazing tolerance, excellent regrowth and more.
