

**FORAGE FIRST®**

## Clover-Based Forage Mix

- Formulated for wetter soils with a history of disease & fertility problems
- Use in soils with low pH (below 6.5)
- Provides strong nitrogen build up in soil

Clover-Based Forage Mix is formulated for wetter soils that have a history of low pH (< 6.5), disease and winter survival problems. This dependable forage is excellent for grazing and hay production, plus building up nitrogen in the soil.

- **Includes CrosseCoat™** - an elite platform of proven seed coating and treatments to enhance germination, establishment and survival

**FORAGE FIRST® FACTOR:** We provide a diverse set of mixes to produce high quality forage for your unique operation. Our versatile pasture mix portfolio offers a variety of proven products to fit any need, created with flexibility and ease of management in mind.

All Forage First® pasture mixes contain top performing forage varieties for improved yield, higher nutritional value, increased stand life and grazing tolerance, excellent regrowth and more.

- 63%** Red Carpet® XL Red Clover
- 25%** Top Tim XL Timothy
- 10%** Radium XL Alsike Clover
- 2%** Orion XL Ladino Clover

### SEEDING RATE (LBS/ACRE)

16 - 18

### SEED INFORMATION

DEPTH (IN)

1/4 - 1/2

### PLANTING TIMES

Best in early spring or fall when weather is cooler and moisture is reliable.
