

**FORAGE FIRST®**

## Special Waterway Mix

- Performs well in hay systems
- Handles a wide range of soil types
- Big Ton XL smooth brome grass provides better quality than common types
- Mixed with endophyte-free tall fescue, persistence of this mix retains quality for many years

Special Waterway Mix was initially created to meet the specifications for Iowa Conservation Division. It is an excellent choice for waterways, right-of-way ditch banks and critical seeding areas throughout Iowa and the surrounding states. Special Waterway works well in hay systems and contains endophyte-free tall fescue.

- **Includes CrosseCoat™** - an elite platform of proven seed coating and treatments to enhance germination, establishment and survival

**FORAGE FIRST® FACTOR:** We provide a diverse set of mixes to produce high quality forage for your unique operation. Our versatile mix portfolio offers a variety of proven products to fit any need, created with flexibility and ease of management in mind.

All Forage First® mixes contain top performing forage varieties for improved yield, higher nutritional value, increased stand life and grazing tolerance, excellent regrowth and more.

- 65%** Big Ton XL Smooth Brome grass
- 20%** Stargrazer XL Tall Fescue
- 15%** Endo-Graze XL Perennial Ryegrass

### SEEDING RATES (LBS/ACRE)

25 - 30

### SEED INFORMATION

DEPTH (IN)

1/4 - 1/2

### PLANTING TIMES

Best in early spring or fall when weather is cooler and moisture is reliable.
