BULLS-EYE DEER TURNIPS 

- Optimally planted 6-8 weeks prior to killing frost, sugars will flush vegetative growth after frost, making it an appealing food source
- Early fall planted annual turnip blend offering early/late fall food source
- Unique blend of turnips provide extensive above & below ground growth

ANNUAL
SEEDING RATE* 2 lbs Per ¼ Acre
BAG SIZE 2 lbs

- Some species within mix will remain green until 10 °F
- Performs well on light to heavy soil types in light shade to full sun

DEER CANDY SUGAR BEETS 

- Late spring planted annual offering early/late fall food source
- Performs well on medium to heavy, well drained soils in full sun
- Provides high energy food source from vegetation & root

ANNUAL
SEEDING RATE* 2 - 3 (Drilled) 8 (Brdcast)
BAG SIZE 1 lbs

8847 GT1 FORAGE SOYBEANS 

- Spring/fall planted annual species offering spring/summer/fall food source
- Performs well on light to heavy soil types in light shade to full sun
- Glyphosate tolerant, late maturity soybean

ANNUAL
SEEDING RATE* 140,000 Seeds/ Acre
BAG SIZE 140,000 Seed Count

- Increased plant height

PLOT SPIKE® FORAGE OATS 

- Spring/fall planted annual species offering spring/summer/fall food source
- Performs well on light to heavy soil types in light shade to full sun
- Easy to establish, producing large amounts of forage

ANNUAL
SEEDING RATE* 100 - 120
BAG SIZE 50 lbs

- Late maturing forage oat
- Selected for cold tolerance

WILDLIFE GRAIN SORGHUM 

- Summer planted annual offering cover for upland game birds, migratory birds & deer
- Quick to establish, requires 60-65°F soil temps for planting/germination
- Food source for various bird species later in fall/winter

ANNUAL
SEEDING RATE* 6 - 8 (Drilled) 8 - 10 (Brdcast)
BAG SIZE 50 lbs

- Performs well on light to heavy soil types in light shade to full sun
- Drought tolerant

WILDLIFE SUNFLOWER 

- Spring planted annual offering cover & food source for upland game birds
- Performs well on light to heavy soil types in light shade to full sun
- Food source for various bird species later in fall/winter

ANNUAL
SEEDING RATE* 6 - 8 (Drilled) 8 - 10 (Brdcast)
BAG SIZE 50 lbs

- Drought tolerant

| PERENNIAL | | | | | | |

- Spring/fall planted native grass perennial mix offering year-round bedding/buffer source
 - Performs well on light to heavy soil types in light shade to full sun
 - Maintenance needed during slow establishment period; alternative to *Annual Habitat Hide-A-Way*
 - Will reach heights up to 8 ft tall
- 34%** Switchgrass
33% Indiangrass
33% Big Bluestem
- See Natives First® Guide for establishment guidelines
- 

10 STEPS TO A BETTER FOOD PLOT!

- 1 Soil test in late spring, early or late summer.
- 2 Add fertilizer/limestone based on soil test 6 months ahead of planting.
- 3 Spray a burndown herbicide and/or lightly till to ensure seed-to-soil contact is maximized.
- 4 Select a premium Brier Ridge® mixture.
- 5 Till the soil and create a smooth, seed bed, firm enough to bounce a basketball.
- 6 Plant seeds no more than 1/8 to 1/4 inches in depth.
- 7 Repeated mowing passes at 4 to 6" (or selective herbicide applications) can help control certain weeds. Repeated mowing maintains quality and preserves nutrient levels.
- 8 Identify wildlife pressure by fencing off a portion to gauge grazing activity.
- 9 Monitor plots closely for what plants are being grazed and when. This will help decision making in future plantings.
- 10 Rotate plots as much as possible when planting annuals. Rotations suppress plant disease. Variations in plantings keep animals interested which means greater traffic.

BRIER RIDGE® RECOMMENDS A 13-13-13 FERTILIZER TYPE, OR SIMILAR, FOR ALL BRIER RIDGE® PRODUCTS, 200 - 300 LBS/ACRE AND 1 - 2 TIMES A YEAR. CONTACT US FOR SPECIFIC RECOMMENDATIONS FOR YOUR SPECIFIC AREA OR GOALS.
