

SucraSEED® Sweet Spot™

- Spring/fall planted perennial mix offering year-round food source
- Performs well on medium to heavy soil types in light shade to full sun
- Quick to establish & able to withstand heavy grazing
- Includes grasses with higher sugar content & higher energy legumes

Hunters and wildlife managers across the US are turning to Sweet Spot™ to create high-nutrition food plots that deer simply cannot resist.

Sweet Spot™ mixes feature High Sugar Grasses. These unique perennial ryegrasses can produce bigger racks and as much as 20% more body mass. Sweet Spot™ is a perennial wildlife mix that establishes quickly, winters well and creates fool-proof food plots year after year.

Sweet Spot™ mixes are more effective on a deer's complex digestive system, which can't process proteins without carbohydrates (sugars). Other plot mixes are packed with proteins, but don't deliver the sugars deer need to process that protein and grow. Sweet Spot™ is high in both protein and carbohydrate content so deer get optimum nutrition.

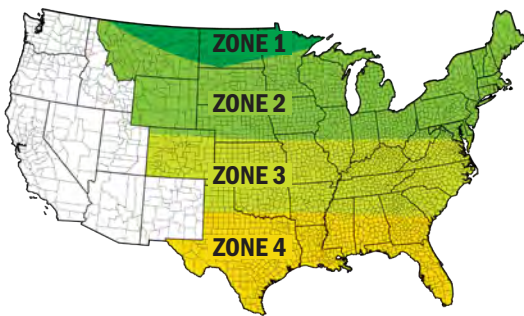

LIFE CYCLE: ANNUAL/PERENNIAL **SEEDING RATE (LBS/½ ACRE):** 10 **BAG SIZE (LBS):** 10

- 55% Aber HSG Perennial Ryegrass
- 10% Medium Red Clover
- 10% Frosty Berseem Clover
- 10% Fixation Balansa Clover
- 7% Ladino White Clover
- 5% Chicory
- 3% Purple Top Turnips
