

Wildlife Grain Sorghum (Dwarf Type)

- Performs well on light to heavy soil types in light shade to full sun
- Quick to establish, requires 60 to 65° F soil temps for planting/germination
- Summer planted annual offering cover for upland game birds, migratory birds & deer
- Food source for various bird species later in fall/winter
- Drought tolerant

Wildlife Grain Sorghum was specifically developed as a fall and winter food source for upland game birds (quail, turkey, pheasant and prairie chicken) and migratory birds (ducks, geese and doves). It is not meant for commercial grain production due to the tannin content.
