DEPTH (IN)	1/4 - 1/2
ESTABLISHMENT (DAYS)	14 - 21

STRESS TOLERANCE (1=WORST, 5 = BEST)

HEAT	4	WEAR	4
DROUGHT	5	TRAFFIC	5

ELITE VARIETIES - Many of our mixes feature elite turf varieties. An “elite” variety is an improved variety holding the most distinguished characteristics of that species.

Spreading Technology - Many perennial ryegrass products in our portfolio benefit from spreading technology, featuring early development of aggressively spreading rhizomes and rapid tillering. These spreading traits boast improved wear tolerance and recovery plus excellent density and persistence.

Look for the “**XRE +**” icon for products with tall fescue varieties featuring even earlier, more aggressive and rapid tillering traits and rhizome expression. These products exhibit superior density, excellent wear tolerance and rapid recovery.

The **Alliance for Low Input Sustainable Turf** is a non-profit, university and industry, cooperative that serves to test, identify and promote varieties to consumers that maintain acceptable turf quality while requiring reduced water, chemical and fertility inputs. To become an “A-LIST Approved Variety”, a variety must have demonstrated superior performance in A-LIST trials.

Shade Tolerant
