

# Max 4N Festulolium

- Improved disease resistance
- Tetraploid variety with high quality & digestibility
- Top yield performer: 108% of checks
- High vernalization requirement for no heading in seeding year

[CLICK HERE FOR TECH SHEET](#)

Max 4N has a high vernalization requirement, there is no heading in the year of seeding. Max 4N has excellent winter hardiness, providing a large forage crop in early spring following the sowing year. It is well adapted to the Upper Midwest and Northeast States and Northeast Canada. Proven by many satisfied farmers, for use as emergency forage and green manure crop.

#### **CHARACTERISTICS:**

Establishment: Fast

Persistence: High

Drought Tolerance: Medium

Winter Hardiness: Medium High

Palatability: High

Yield Potential: Medium High

Grazing Tolerance: High
